Cody / Navigation Atlas

A companion to the Screen and Expression Planning Atlas.

SEE THE SCREEN.

FOLLOW THE FLOW.

Small UI previews keep the same screen IDs. Labelled arrows show actions, automatic events, failures and the route back.

Plan navigation before implementation. HTTP, PC integration and voice are future paths. Local character and UI work remain the first PoC.

38 screen entries / 40 views

HOW TO READ THE MAP

- **User action**
- **Automatic event / condition**
- **Failure / interruption**

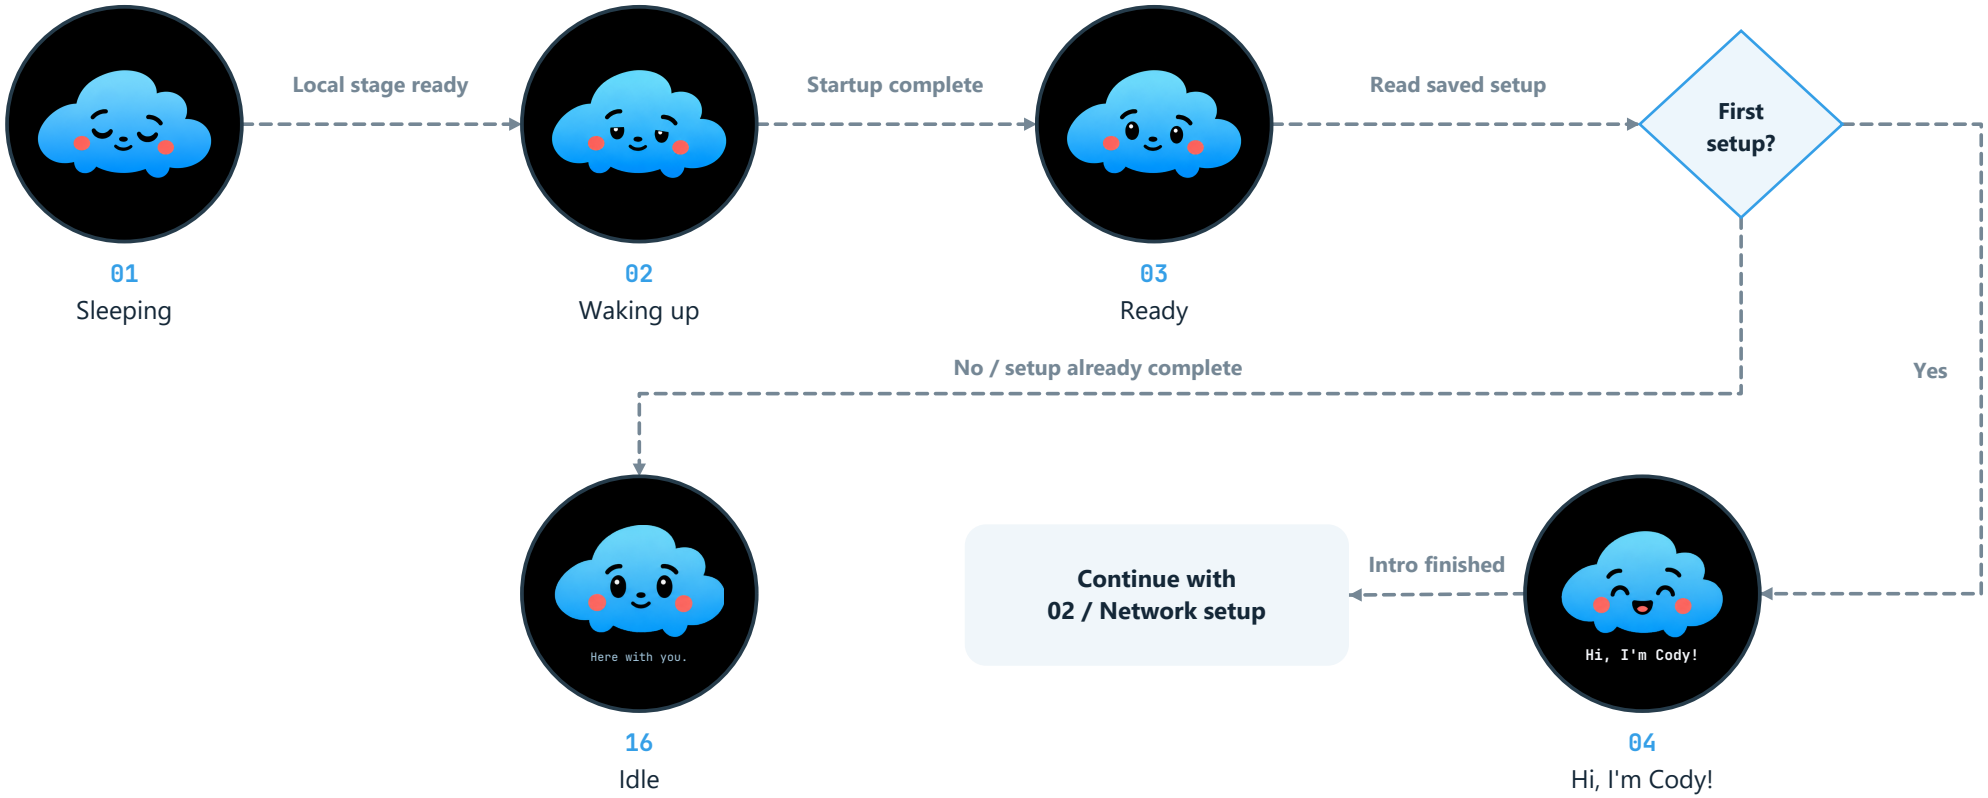

FUTURE Planned connected features

Back is still a left-chevron icon on the UI. The map names the destination. Notes belong below each flow.

01 / Boot and entry

Startup checkpoints lead to first-run setup or the existing local context.

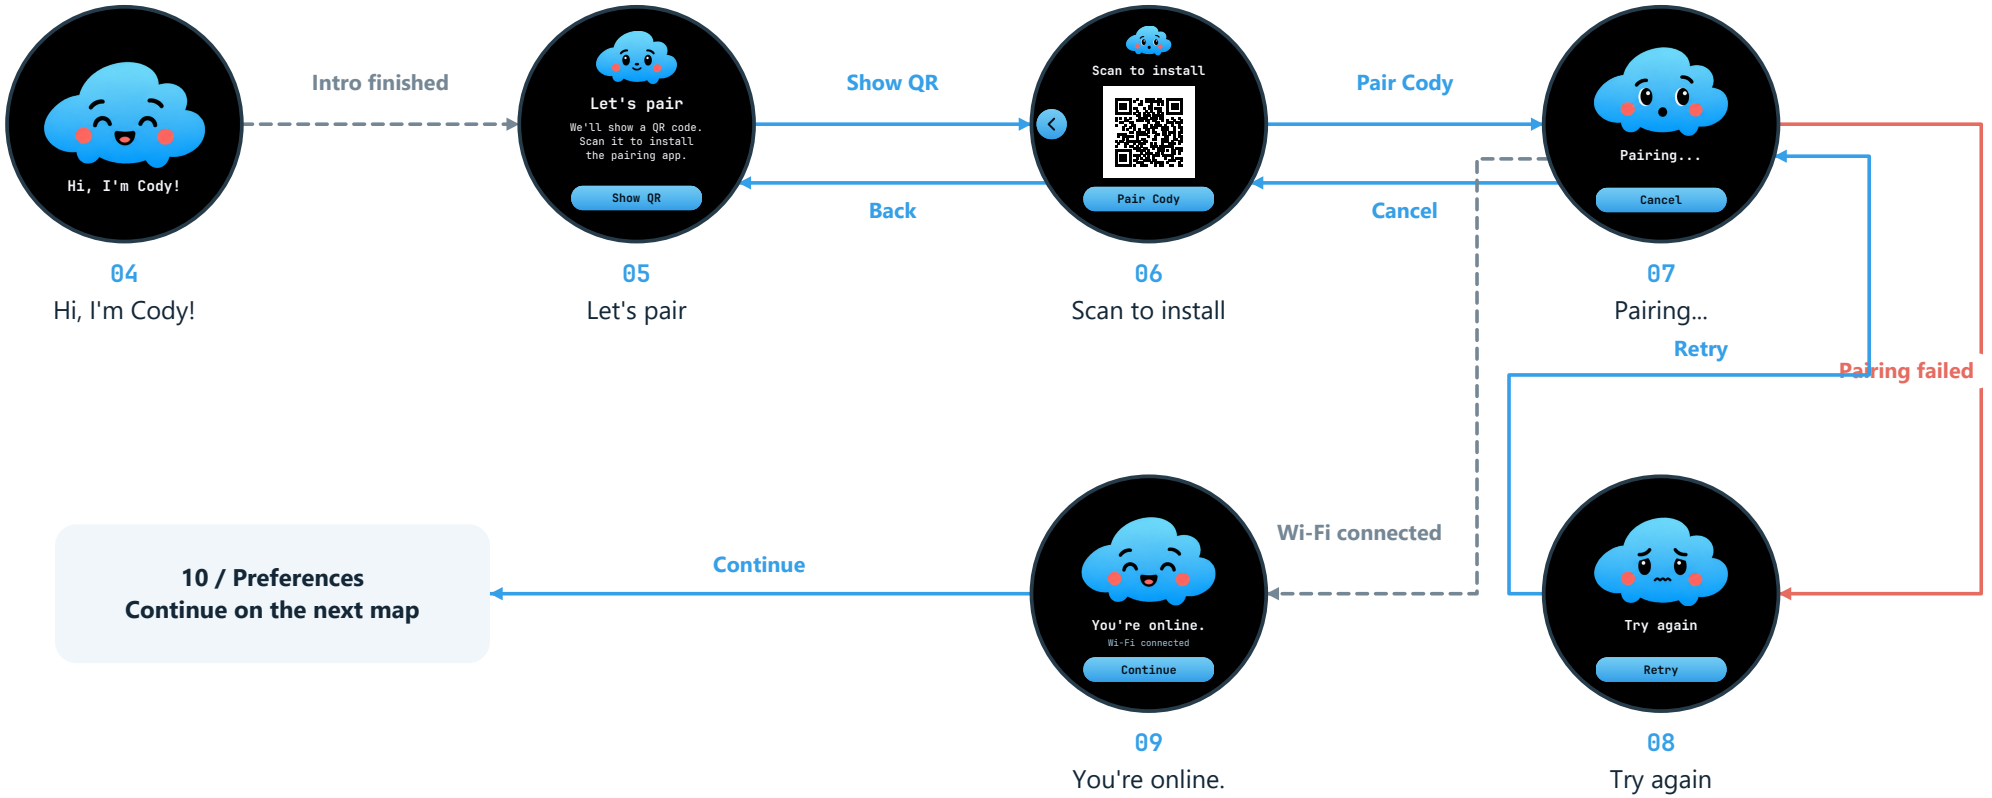

A startup failure keeps the last valid checkpoint visible. Ready never means that the PC is already connected.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

02 / Network setup

One main path, with explicit Back, Cancel and Retry loops.

04
Hi, I'm Cody!

05
Let's pair

06
Scan to install

07
Pairing...

08
Try again

09
You're online.

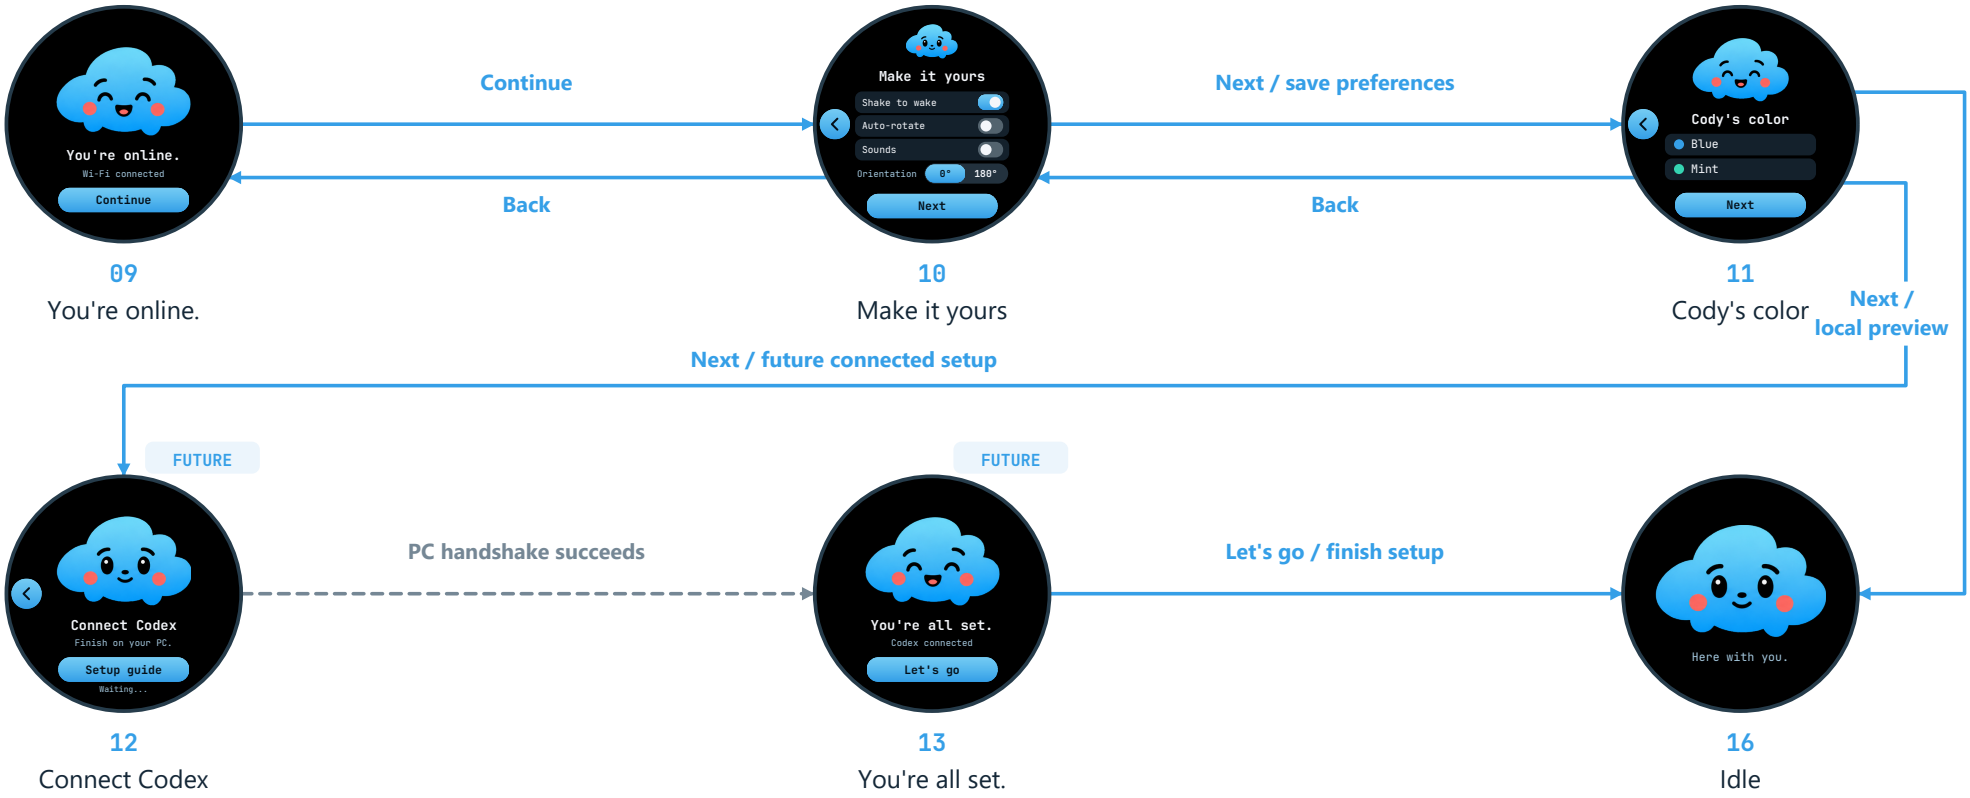

The install QR and device pairing are separate steps. Retry re-enters pairing; it does not restart the entire OOBE.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

03 / Personalization

Persist preferences, then complete the local preview or the future PC setup path.

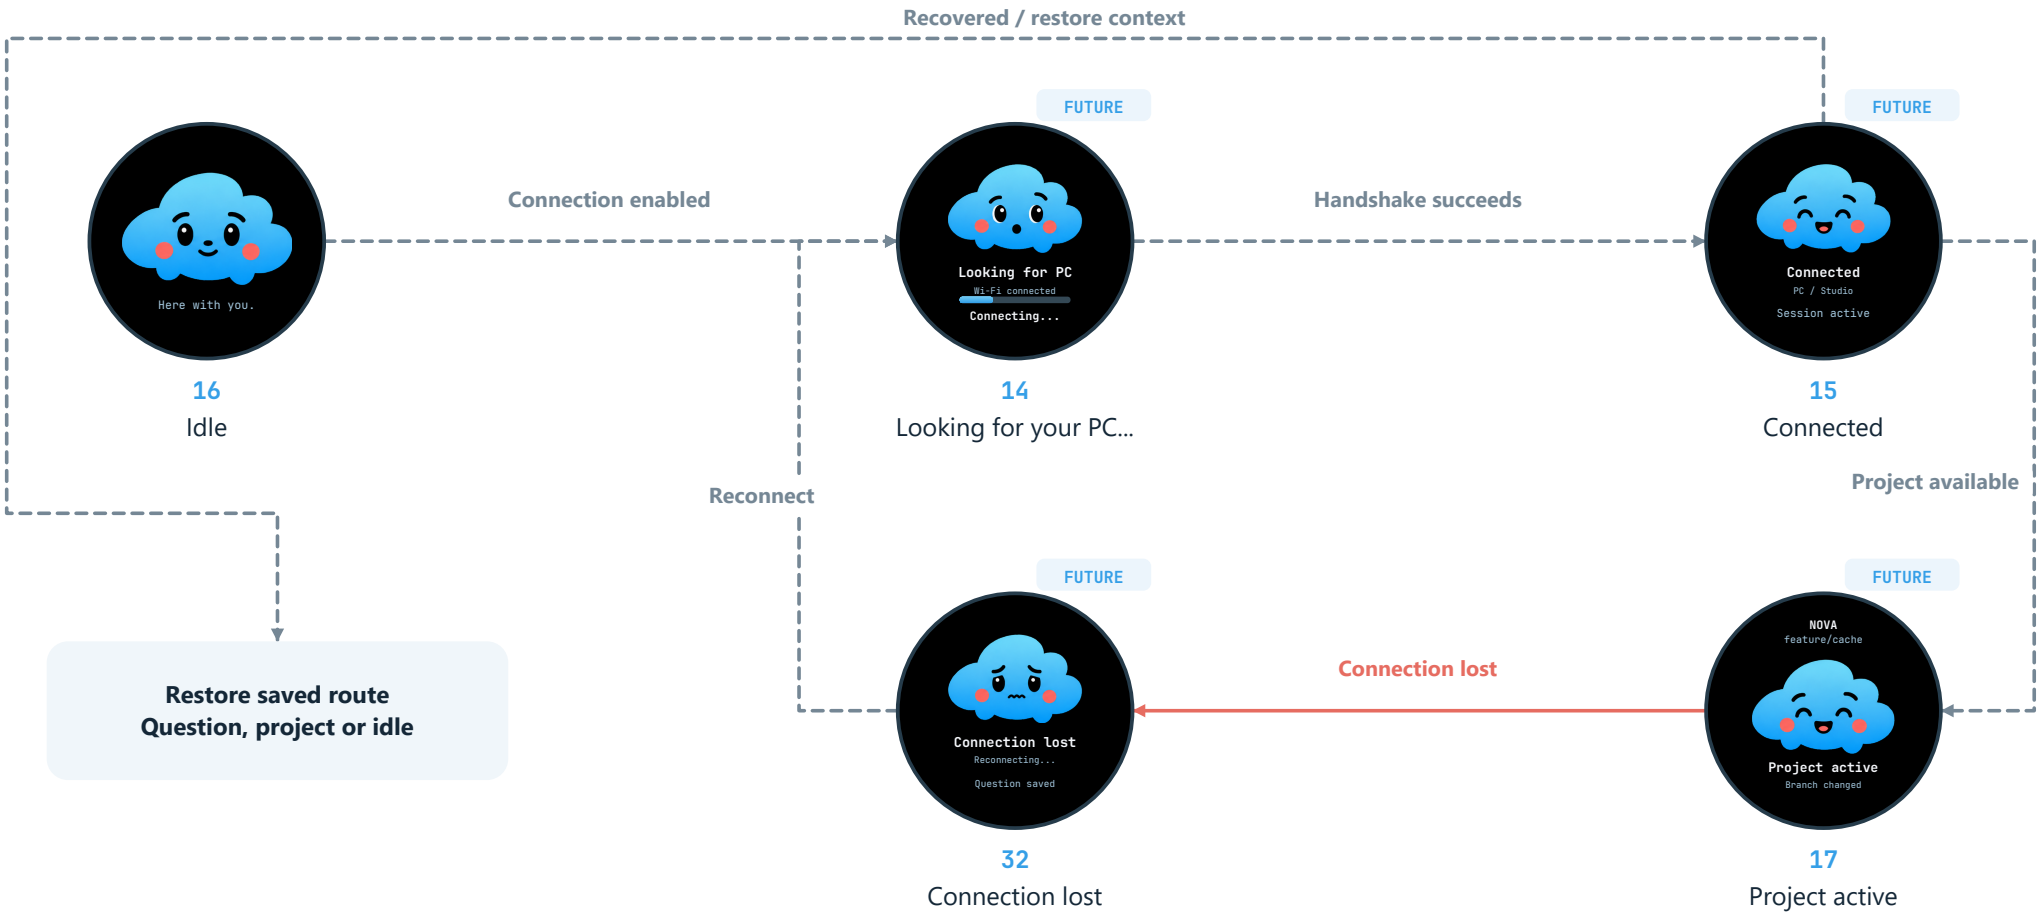

Setup guide opens PC instructions. Back from 12 returns to 11. The local-preview shortcut is a PoC proposal, not release policy.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

04 / Connect and recover

Future application connectivity is independent of local UI and expression channels.

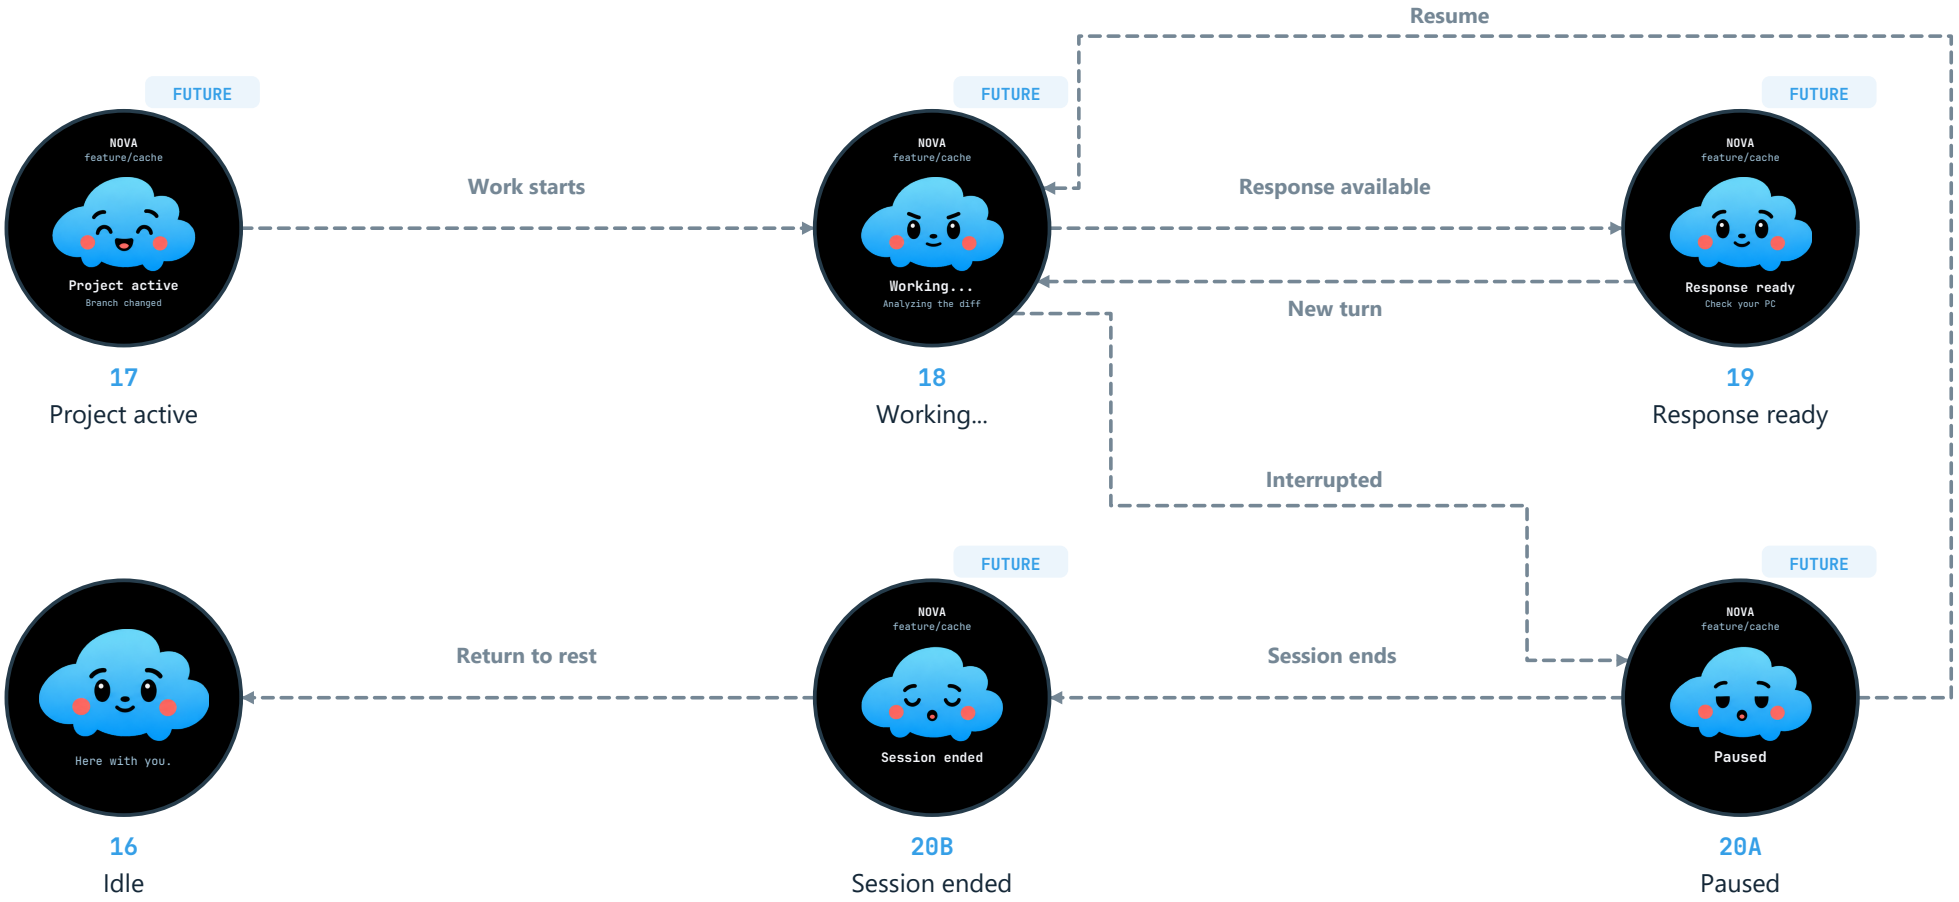

First connection selects project or idle. Recovery restores pending content. No project means 16; an open question remains open.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

05 / Everyday activity

Activity updates change the shared context view; they do not overwrite pending questions.

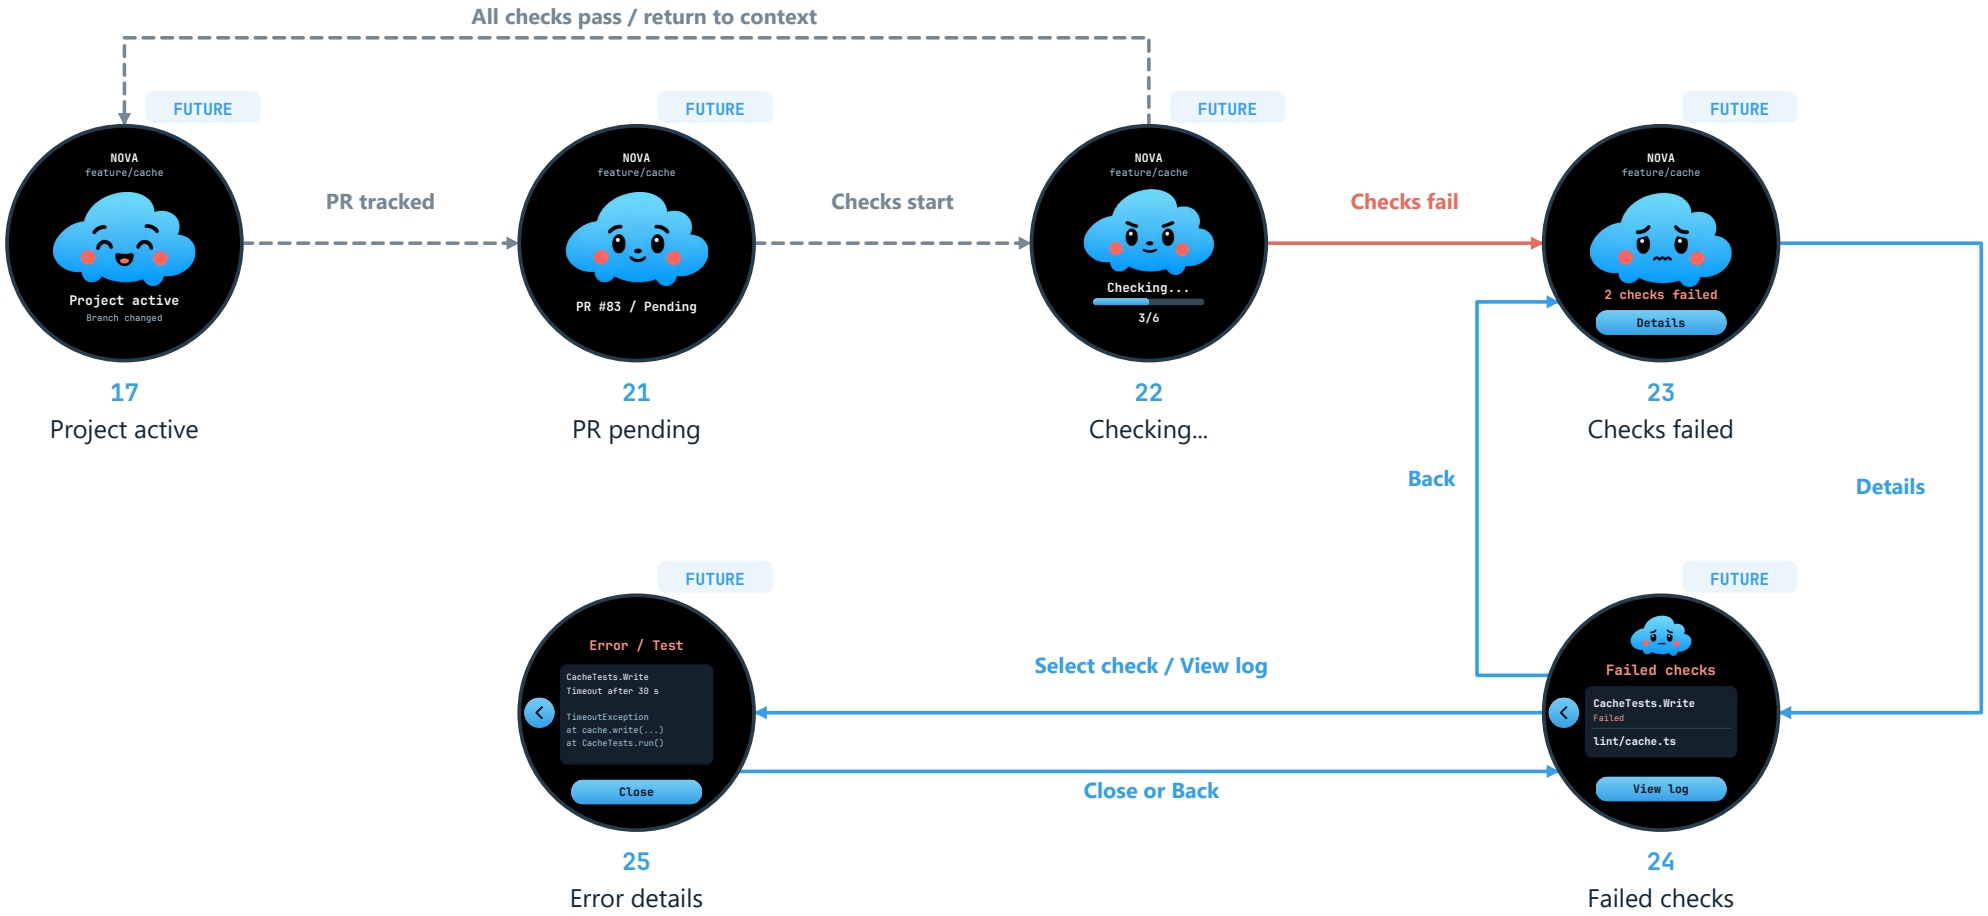

Reading, Editing and Running are variants of 18. Response ready is not proof of success. Session-ended handling also applies from 17-19.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

06 / Pull requests and checks

A result branches into details or returns to the active project.

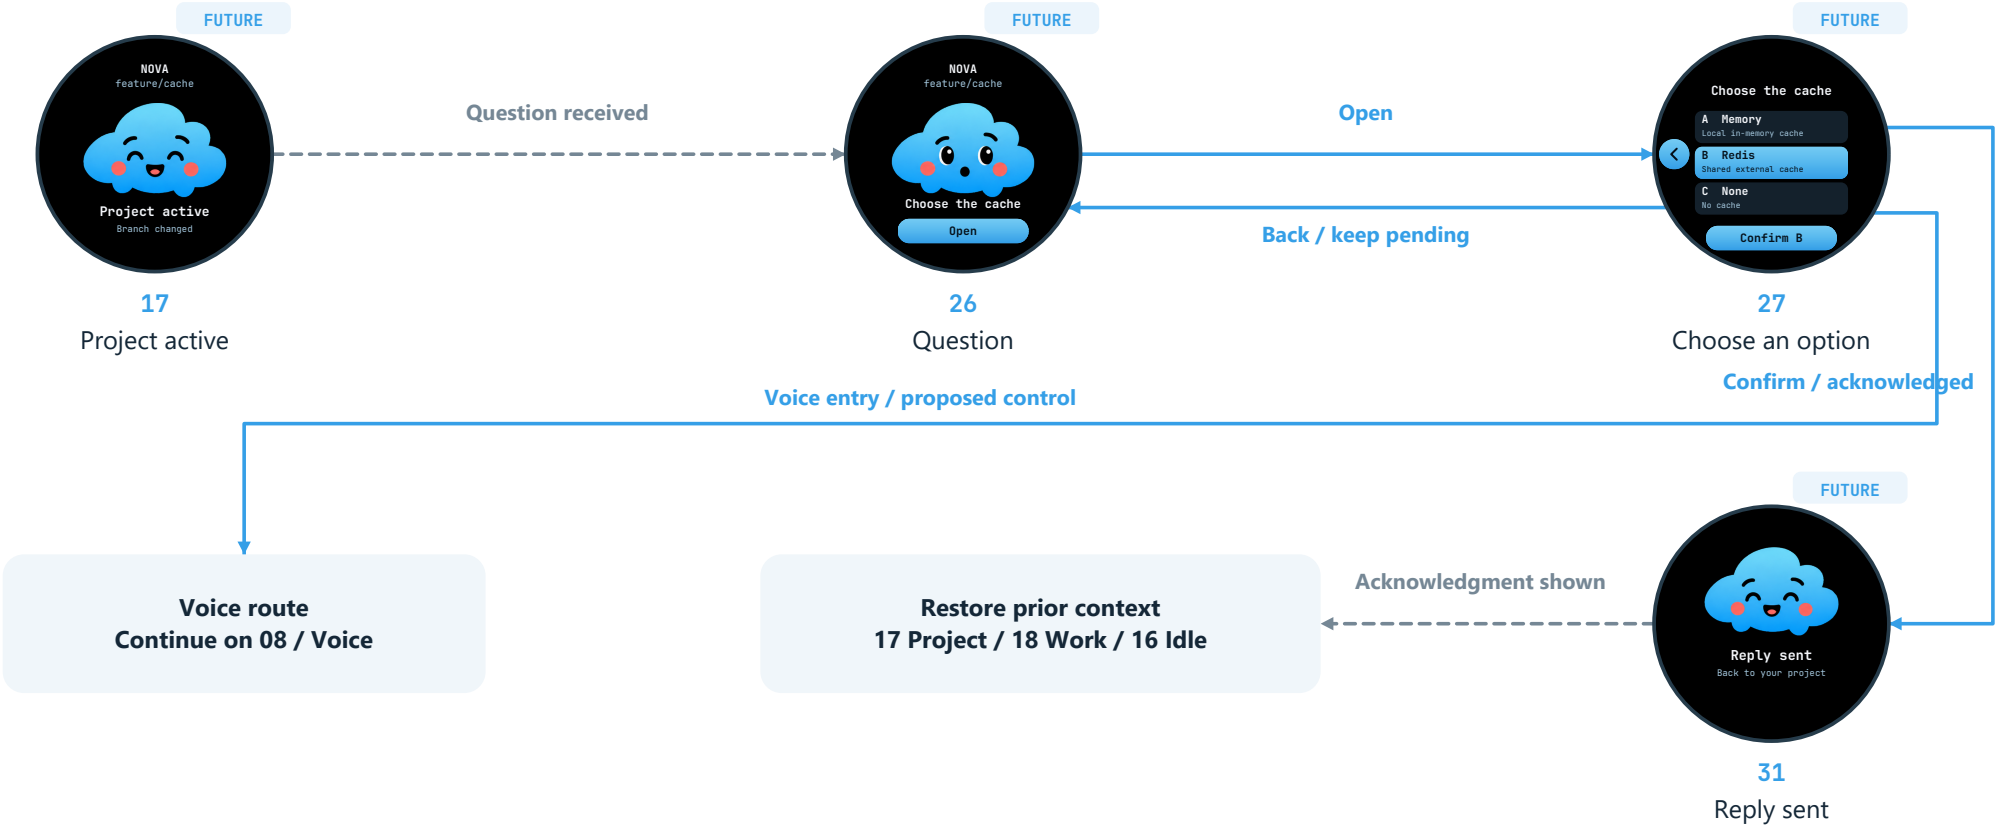

Results belong to the selected project, branch and commit. A stale result must not be shown as the current revision's status.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

07 / Questions and answers

Selection is reversible; sending is deliberate and waits for acknowledgment.

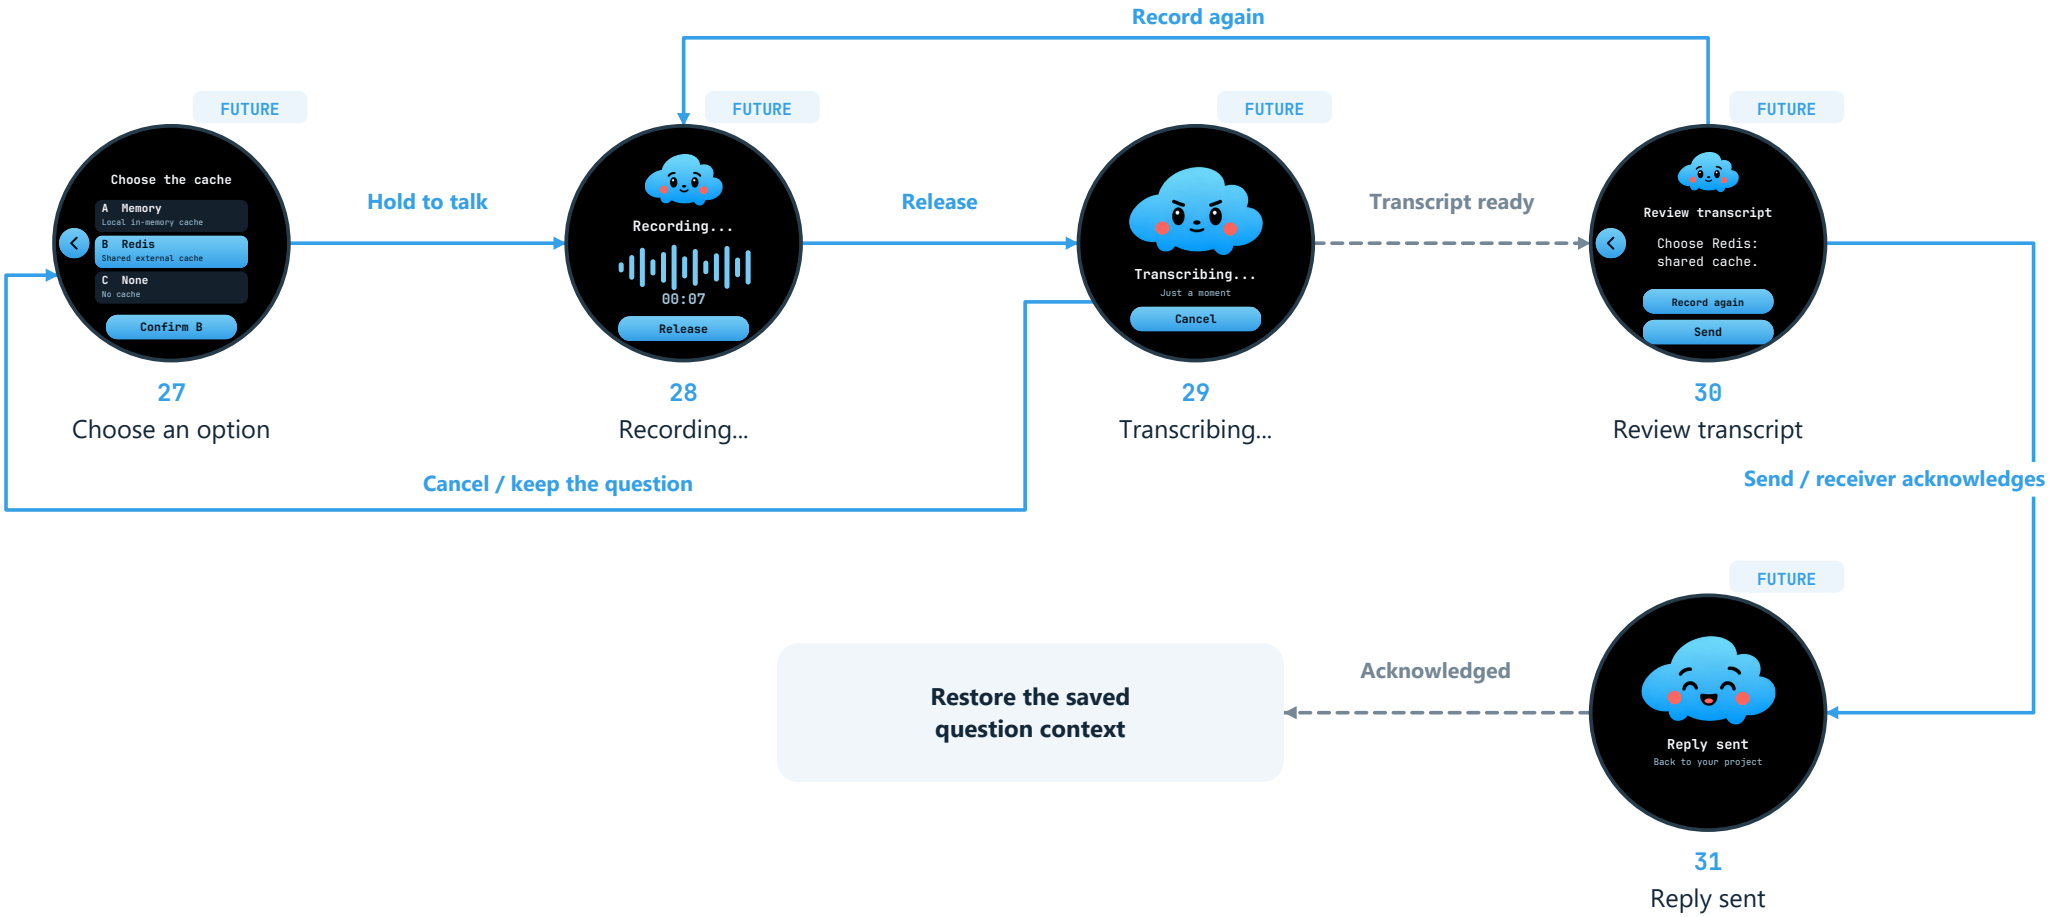

Timeout, cancel and disconnection never choose an answer. The voice-entry control is an open UI decision for the future integration.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

08 / Voice response

Record, review and send. The question remains the owner of this temporary flow.

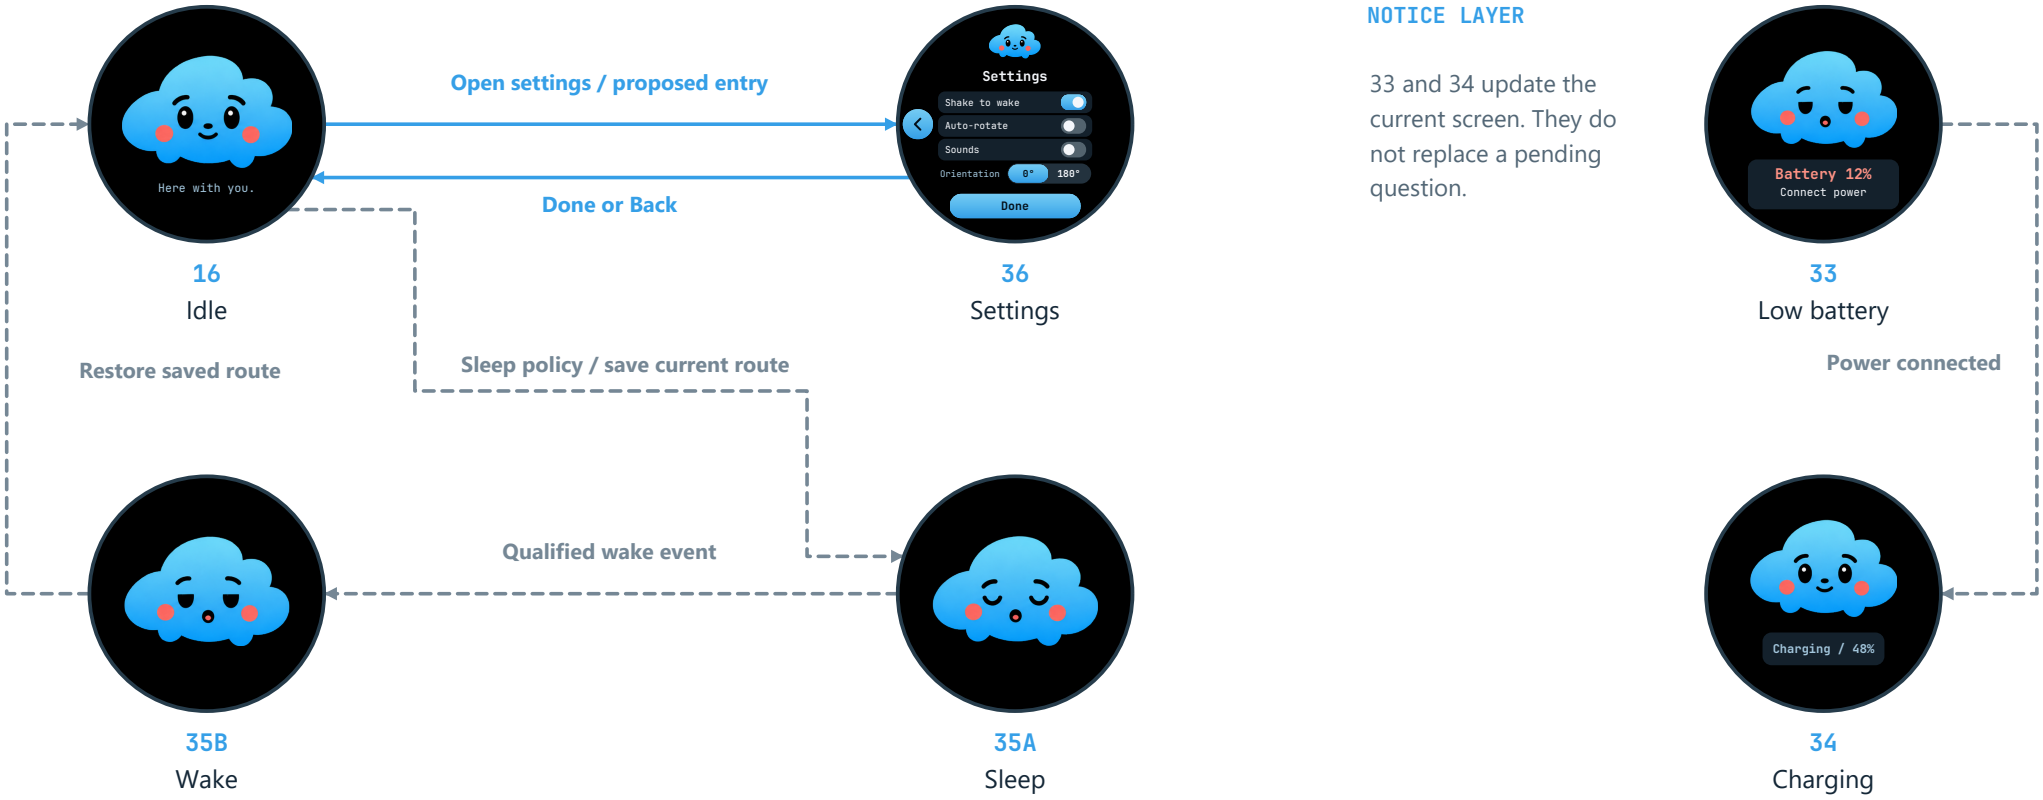

Back from review returns to 27 with the draft retained. Capture/transcription failures offer retry or cancel; no false Reply sent state.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

09 / Device state and settings

Settings is a route; charge notices are layers; sleep and wake preserve navigation history.

NOTICE LAYER

33 and 34 update the current screen. They do not replace a pending question.

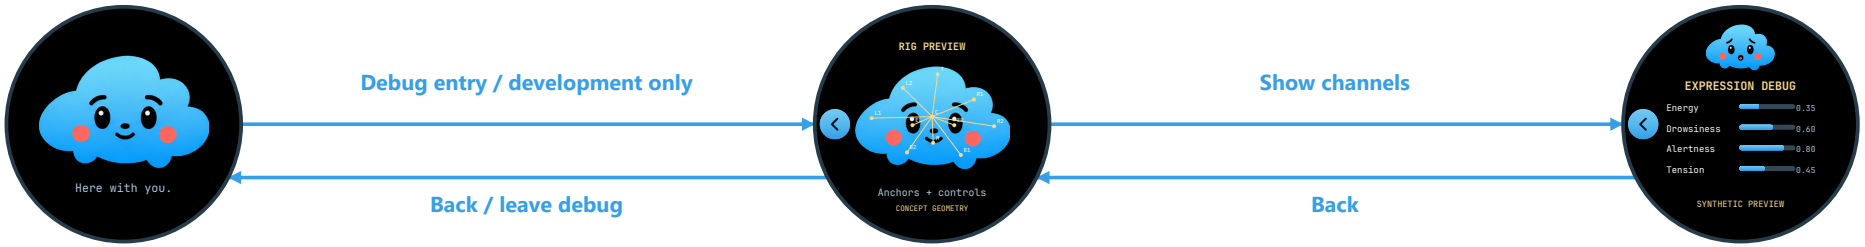

Sleep policy must protect pending interactions. Wake restores the prior route, not always Idle. Exact settings-entry gesture remains to be chosen.

NOTES

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

10 / Character debug

Inspect the rig and channels while keeping the same reusable character.

16
Idle

37
Rig view

38
Expression channels

Local events
Motion / touch / charge

Update values

Expressive values
Energy / tension / alertness

Compose channels

One composed pose
Eyes / brows / mouth / body

The lower pipeline is not screen navigation. Breathing, blinking and expression changes update the current view without changing routes.

Return paths and open decisions

Use this sheet to settle navigation details before the PoC.

06 Scan to install	**Back -> 05**	Preserve the current setup attempt.
07 Pairing	**Cancel -> 06**	End the active attempt before leaving.
08 Try again	**Retry -> 07**	Restart only the failed pairing step.
10 / 11 / 12 Setup	**Back -> 09 / 10 / 11**	Persist only explicitly confirmed settings.
24 Failed checks	**Back -> 23**	Retain the selected project and PR.
25 Error details	**Close / Back -> 24**	Retain the selected check and scroll state.
27 Answer options	**Back -> 26**	Keep the question pending; do not submit.
29 Transcribing	**Cancel -> 27**	Keep the pending question intact.
30 Review transcript	**Back -> 27; Record again -> 28**	Retain a draft until replaced or discarded.
31 Reply sent	**Return -> saved context**	Display only after receiver acknowledgment.
32 Connection lost	**Recover -> saved context**	Restore the exact pending route where possible.
36 Settings	**Done / Back -> caller**	Caller may be Idle, project or another route.
37 / 38 Debug	**Back -> caller / 37**	Development-only access remains explicit.

OPEN UI DECISIONS

Settings entry gesture; future voice-entry control; final OOBE completion policy; capture/transcription error details. Planned Back icons are added to previews 10, 37 and 38 for this navigation review.

Network setup / revised route

A01 supplements base pages 03 and 12. Insert screen 06-bis; keep all existing IDs.

REQUESTED BY	AFFECTED BASE PAGES	PRINT ONLY THIS PAGE
Umberto Giacobbi (project owner)	**03 / 12**	**13 / keep the existing printout**

WHY App installation and device provisioning use different QR payloads. The route needs a distinct device-QR step.

BACK / CANCEL / RETRY

06 Back -> 05
06-bis Back -> 06
07 Cancel -> 06
08 Retry -> 06-bis
09 Continue -> 10

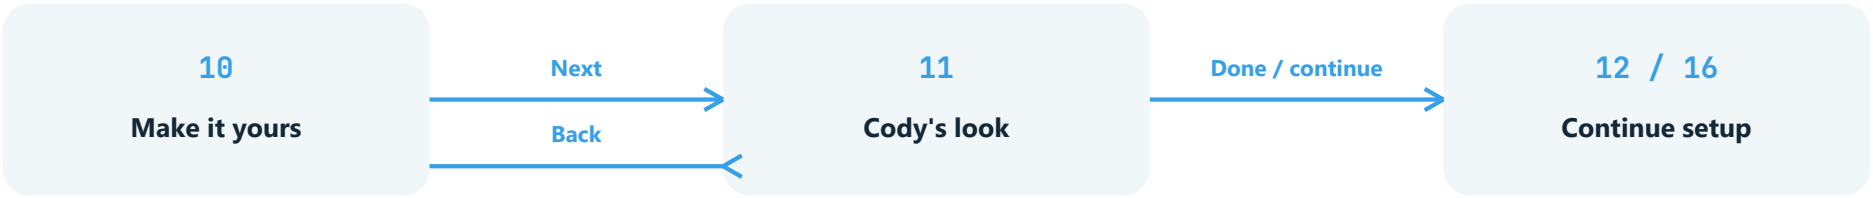

Pair Cody starts BLE provisioning before opening 06-bis. Back, Cancel and recoverable failure close the active session before navigation; cleanup errors remain visible. Retry opens a new attempt. Credentials received advance to 07; confirmed Wi-Fi and IP advance to 09.

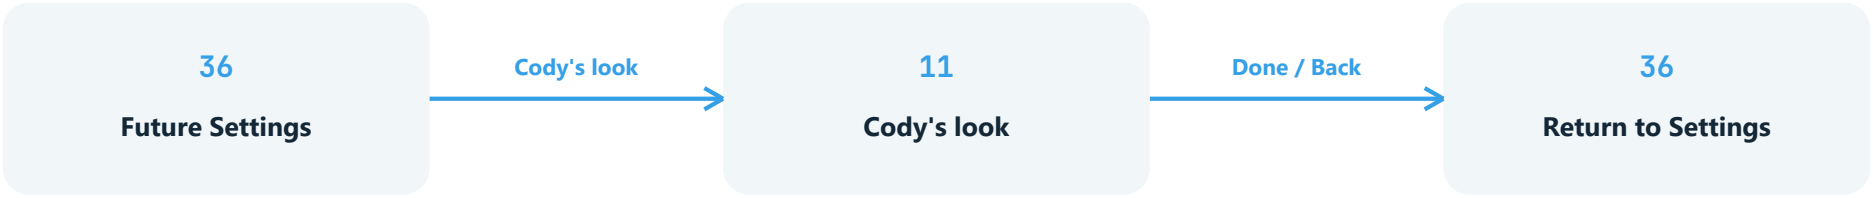

06: remove 'Scan to install'. QR previews remain illustrative. This is a requested design update, not firmware validation.

A02 / Screen 11 selection route

The same selector can be called from first setup and from future Settings.

ROUTE RULE

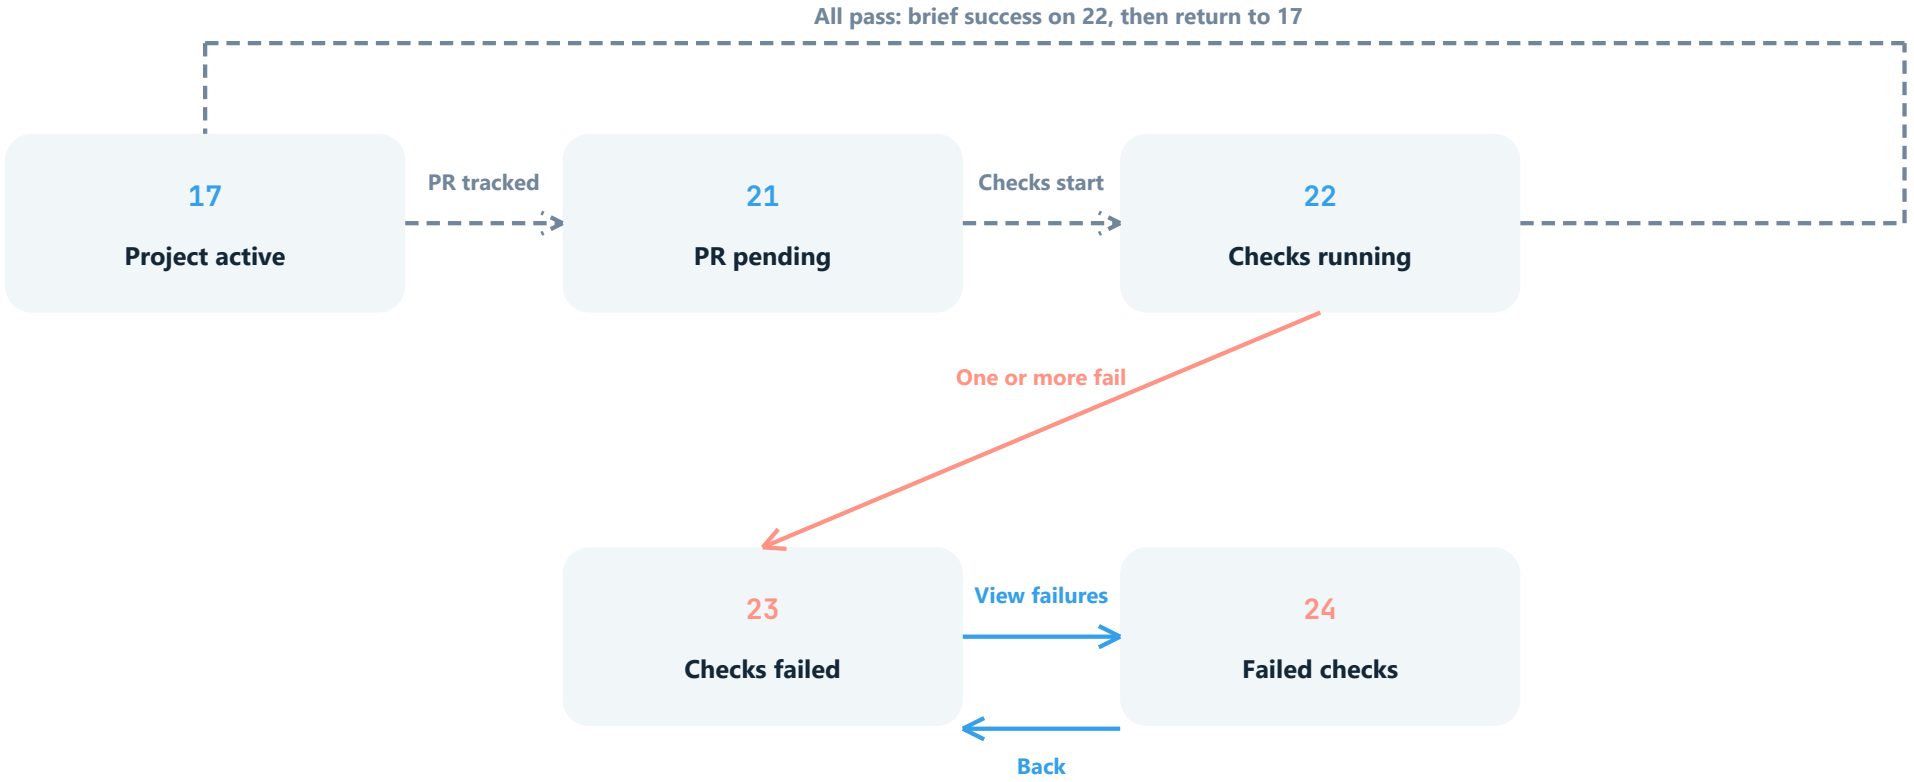

Screen identity 11 stays stable. Only its user-facing title and content change. Selection does not create five routes: all choices remain inside one scrollable screen and preserve the caller for Back/Done. This supplements base navigation page 04.

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

A03 / Read-only pull-request flow

Cody reports verified status and failure names; PR work stays on the PC.

PRINT PAGE 15 ONLY

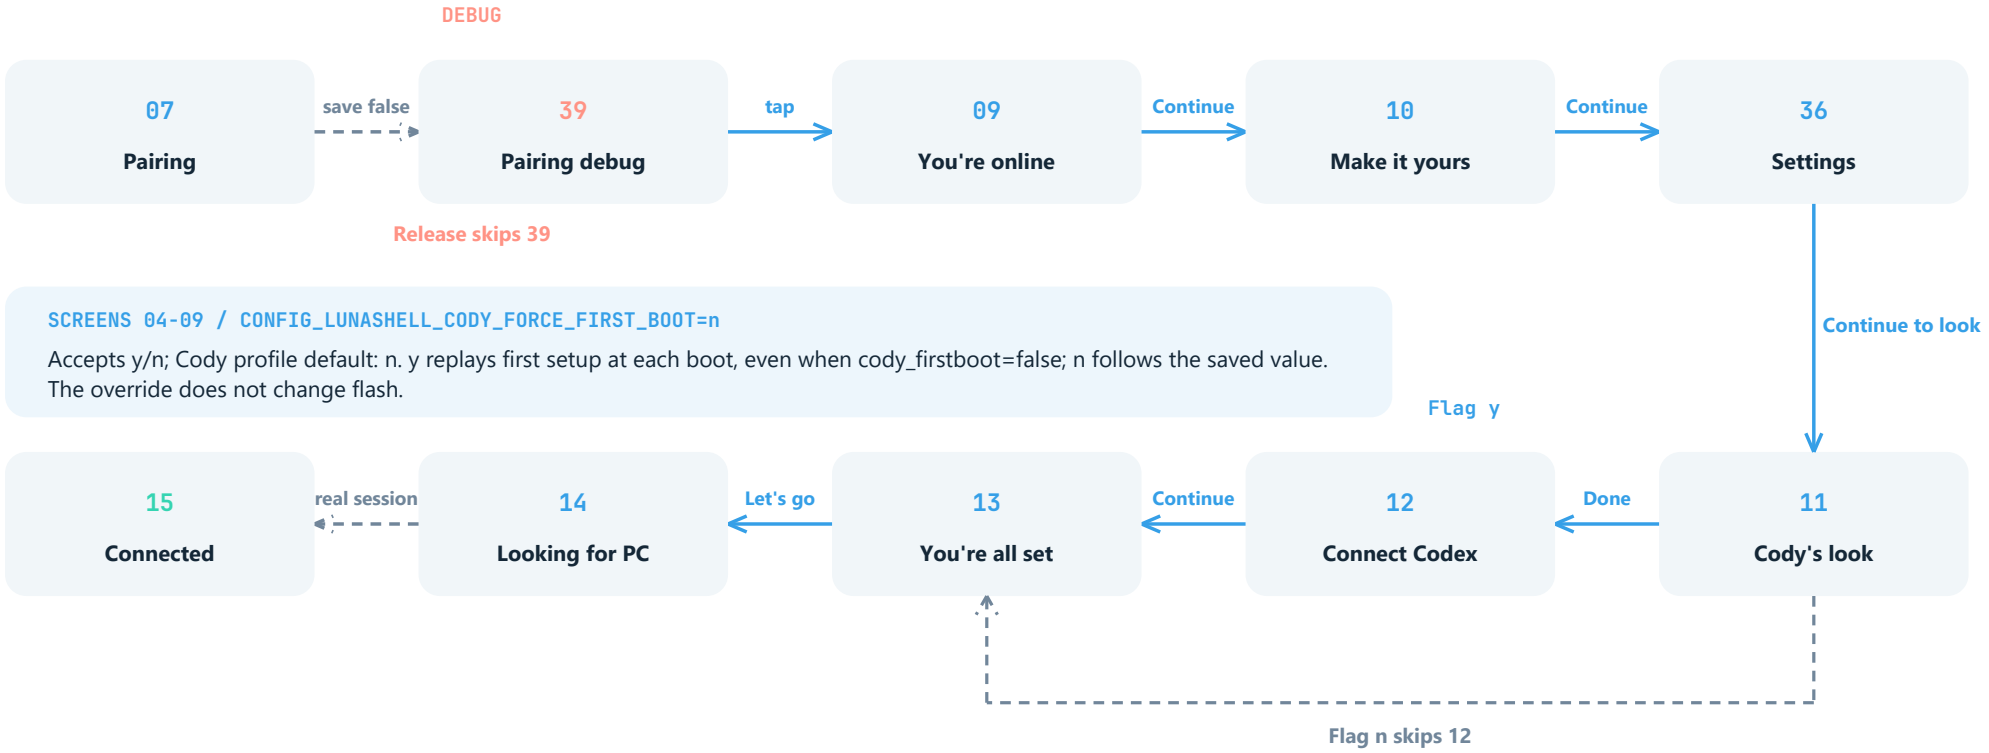

DATA RULE	Counts and conclusions belong to the exact PR head commit. If the companion cannot provide a complete, current check list, screen 22 says only 'Checks running' and does not invent progress.
25 RETIRED	No route opens raw logs on the device; detailed investigation remains on the PC.

Umberto Giacobbi | hello@umbertogiacobbi.biz
Copyright umbertogiacobbi.biz 2026 - confidential

A04 / Pairing-to-personalization route

Persist first boot before success UI; gate screen 12 explicitly and never invent PC connectivity.

PRINT PAGE 16 ONLY

SCREENS 04-09 / CONFIG_LUNASHELL_CODY_FORCE_FIRST_BOOT=n

Accepts y/n; Cody profile default: n. y replays first setup at each boot, even when cody_firstboot=false; n follows the saved value. The override does not change flash.

ROUTE RULES

Screen 09 uses a 60-second standby override. Wake restores 09 and does not activate Continue. Screens 36 and 11 are reusable personalization routes. Screen 11 has no Back in first setup and cannot finish before an explicit row tap. Screen 15 is admitted only by a real current Codex/PC session state; screen 14 remains pending otherwise.

SCREEN 12 / CONFIG_LUNA_SHELL_CODY_ENABLE_CODEX=y

Controls Codex connection setup. Explicitly configured y and currently always enabled; n skips 12, from 11 to 13.

Idle moments without leaving Idle

A05 supplements base pages 02, 06, 10 and 11. Screen 16 retains its identity.

3.2 seconds -> return to the same Idle expression -> 40-second cooldown -> new 20-40-second wait. The automatic clock greeting may stay visible behind these accents. Onboarding Hello 04 remains a separate route.

Copyright umbertogiacobbi.biz 2026 - confidential

Interrupt promptly and protect real work

Transient gesture policy; no new settings writes and no extension of device inactivity.

Normal Idle	Allow the three gestures only while the normal Main view is running, with a resting expression and no current personality symbol or caress.
Touch, Sophia or activity	Cancel the gesture as soon as the route/model consumes the real interaction. New motion-derived stress, microphone activity or other playback also takes priority.
Settings / setup / work	Suppress scheduling outside screen 16. Never navigate away from a question, pairing attempt, working state, error, settings or Debug route to show a gesture.
Pause / Sleep / Wake	Do not admit gestures while paused or during lifecycle transitions. Active-time clocks exclude parked time; no backlog or catch-up scene is created.
Whistle admission	Only a completed visible pursed-mouth frame may request sound. Quiet hours, volume zero, disabled sounds, busy audio and cooldown suppress it; do not retry later.
Audio ownership	The audio owner publishes the actual cue identity and successful PCM level in the canonical snapshot. Cody's own whistle keeps its mouth pursed; unrelated playback interrupts.

Source implementation and the Windows visual model were updated. Firmware build, tests, simulator execution and physical appearance/acoustics remain unverified and require separate authorization.

Errata and corrections

Revision date: 05 October 2026. Previous pages and addenda remain intact.

Breathing visibility	Clarifies a visible mouth pulse under stress: 35% closing, 16-22% reopening and a 4.5% width pulse. Affects screen 16 / Idle and the Stressed expression.
Three idle scenes	Adds IS02 Yawn, IS03 Whistle and IS04 Greeting alongside IS01 Breathing. These are transient screen-16 accents, not new routes or status measurements.
Random scheduling	Replaces the fixed idle-yawn trigger with a random 20-40-second eligible wait, a 3.2-second gesture and a 40-second cooldown. Excludes immediate repeats.
Audio and interruption	Adds one original 300-ms whistle via the existing optional sound owner. Documents cancellation, quiet/volume/busy suppression and canonical playback identity.
Affected original references	Manga pages 03-04 (cue language), 14 (circular placement), 15 (handoff/motion); Navigation pages 02, 06, 10, 11-12. Screens 04, 16, 35A/35B, 36-38 retain their identities and navigation.
Preservation and evidence	Original pages 1-16, including all earlier addenda/errata, are preserved. This revision appends two design pages and this errata page. Runtime behavior and acoustics have static source review only.
