Cody / Codex Connection Atlas

A visual journey from the code on Cody to the PC you choose.

ONE CODE.

YOUR CODEX.

See it on Cody. Enter it in Codex.
Let the two sides confirm the connection.

CODY'S CODEX PLUGIN

CCP is the local companion inside Codex on your Windows PC.

14 visual pages / English / A4 landscape / space to write

01 / The whole journey

Five screen identities. One deliberate choice. Then Cody looks for the paired PC.

12 Show the code

Read it here.
Enter it on the PC.

13 Setup confirmed

Both sides have
kept the link.

16 Idle

A short pause
with Cody.

14 Find your PC

Only the saved
PC is accepted.

15 CCP is ready

The companion
can be reached.

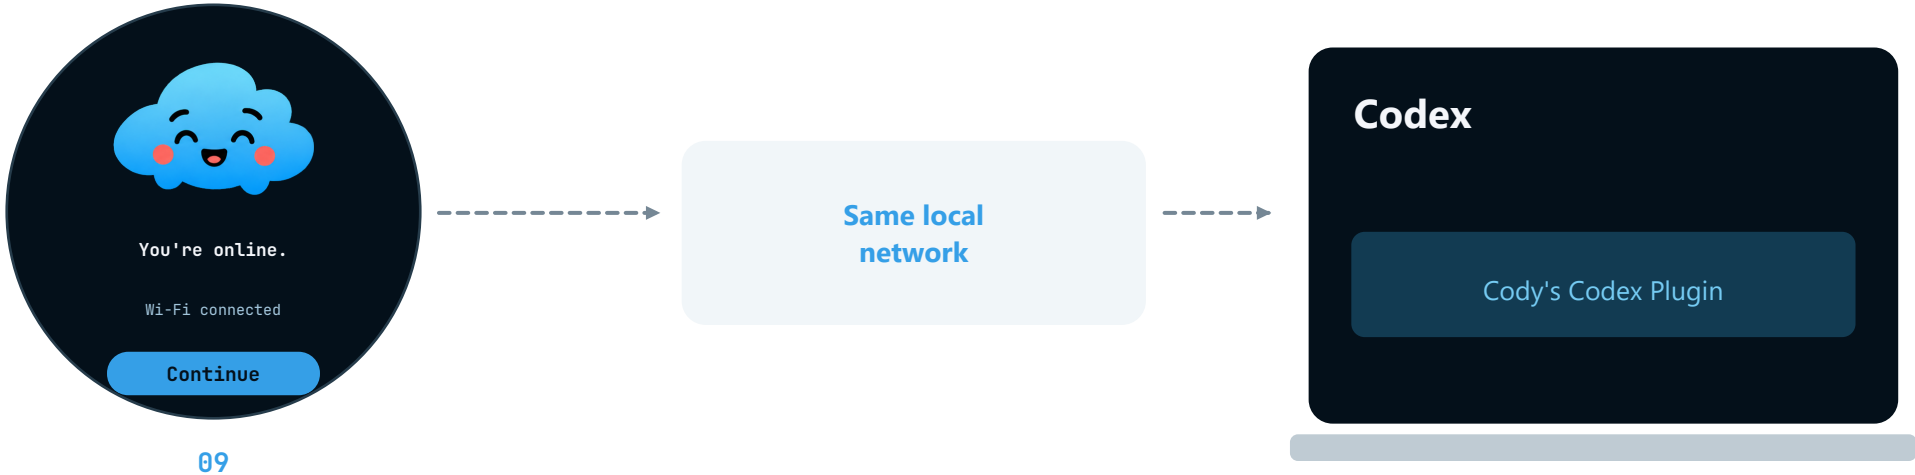

You act — Cody / PC responds — Waiting / recovery

08 / 100 PCs. One chosen connection.

You choose by pairing from your Codex PC. Cody then remembers that relationship.

ONE NETWORK

100 PCs / 1 paired

Other PCs stay outside this connection.

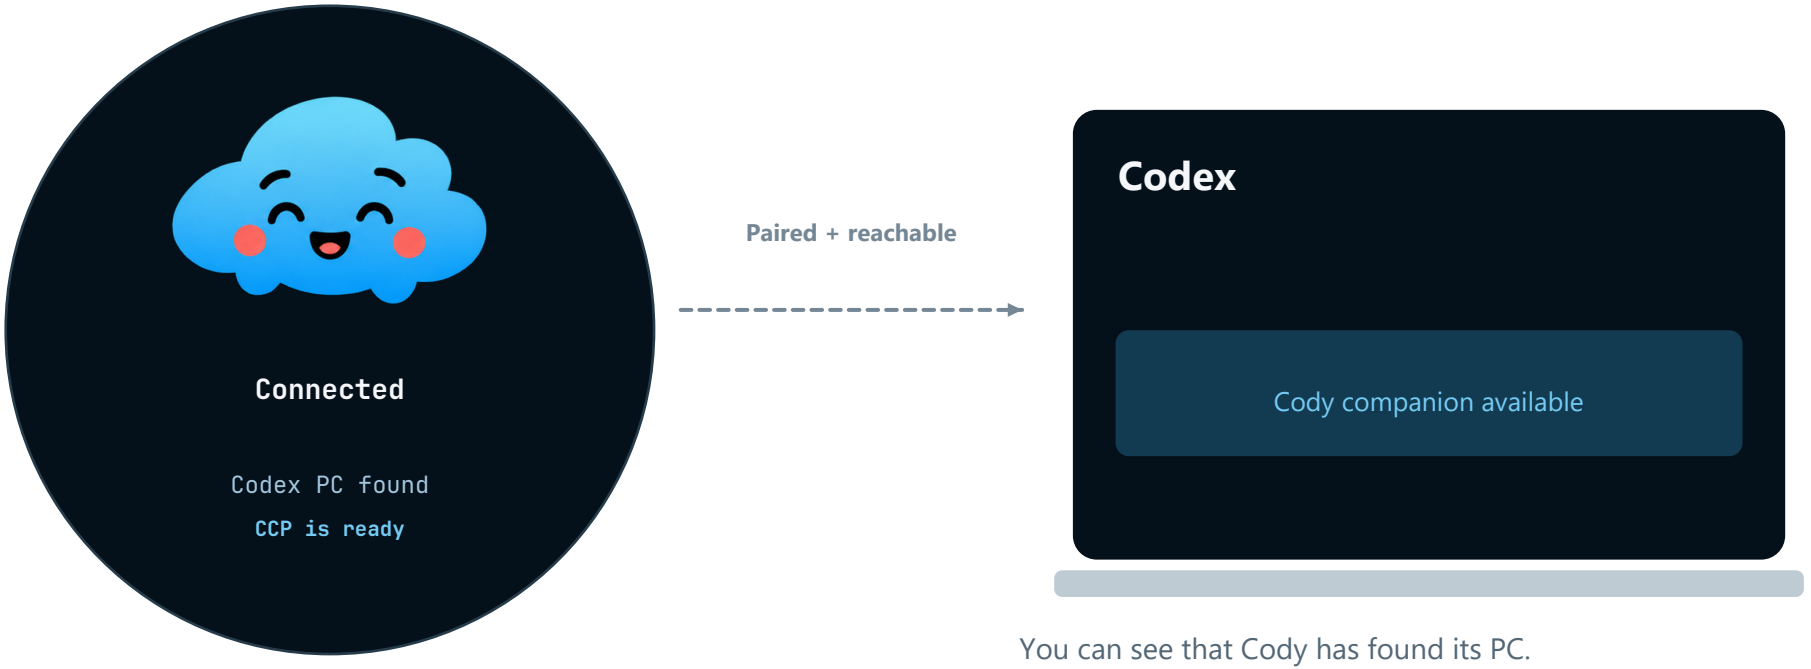

Cody follows the saved pairing, regardless of which PC answers first.

11 / When the code does not pair

Keep the next action simple and show success only when pairing completes.

CHECK THE CODE

Read it again

Use the six characters currently shown on Cody.

CODE EXPIRED

Tap Retry on Cody

A fresh attempt shows a new code.

MATCH IS UNCLEAR

Wait for a fresh code

Let the attempt expire, then tap Retry. CCP leaves the choice unresolved.

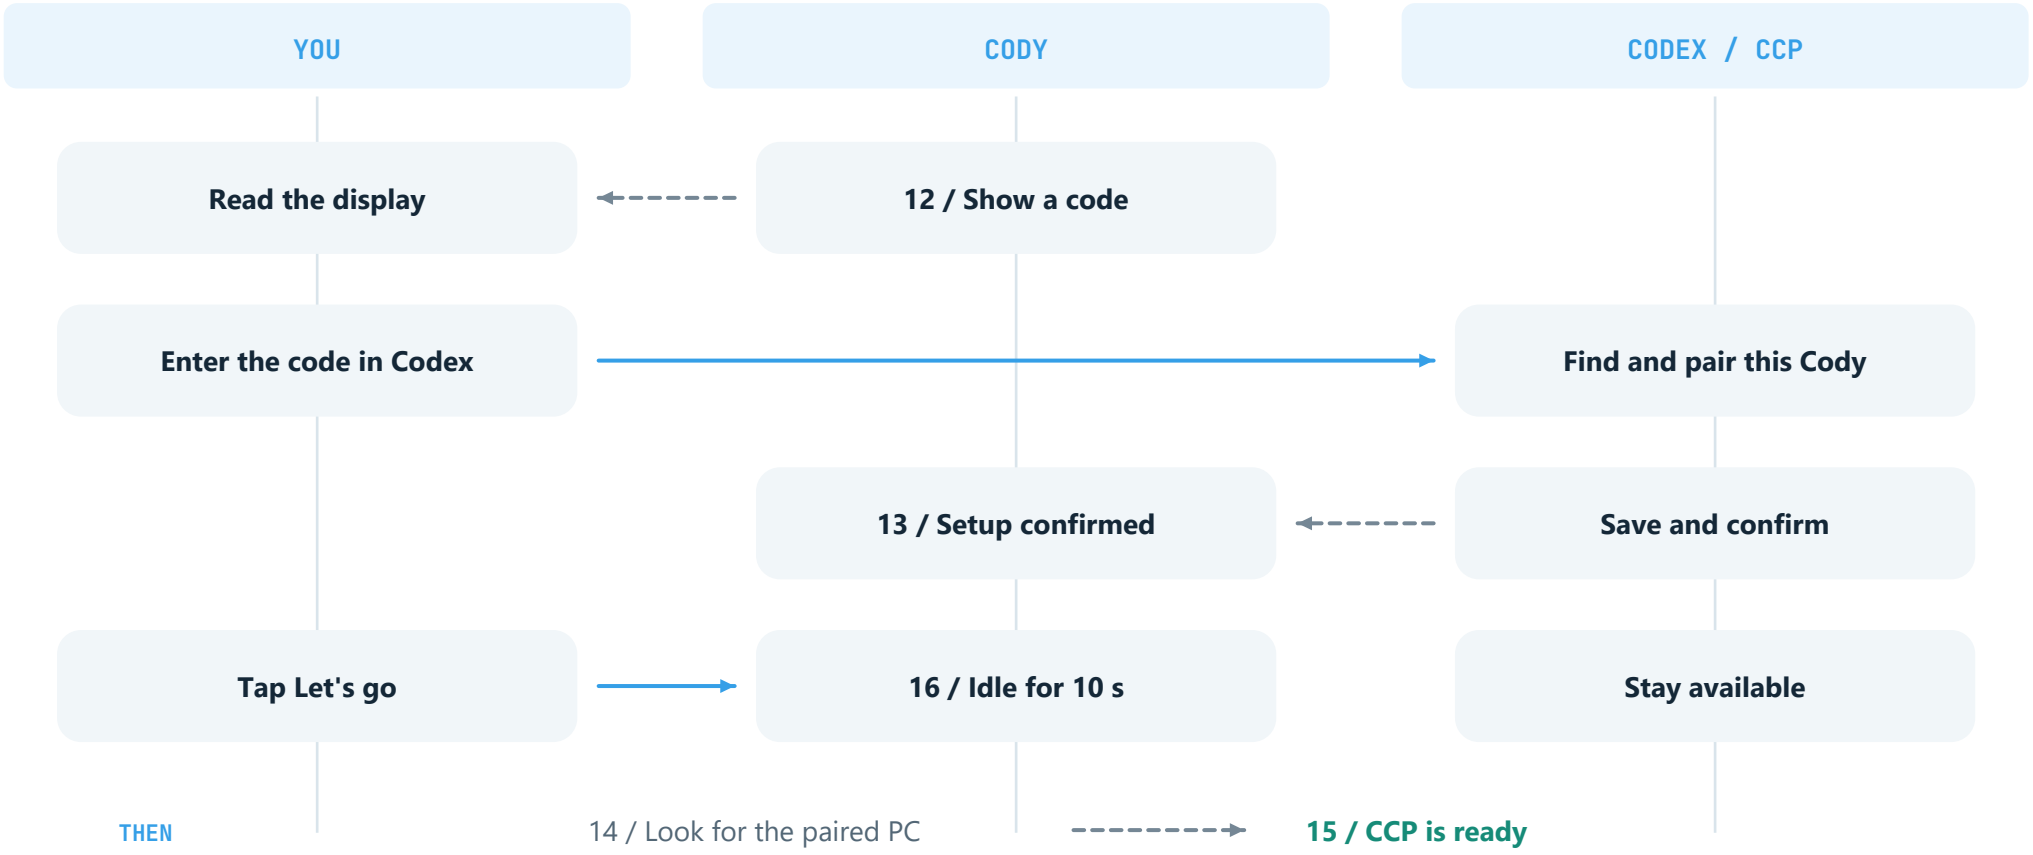

If the PC cannot see Cody, check the shared network and that CCP is running.
